About

Senior DevOps & Platform Engineering leader with 20+ years of experience driving large-scale cloud and CI/CD transformation. Trusted partner to R&D leadership, building and leading high-performing DevOps organizations (25+ engineers) across complex multi-cloud platforms (AWS, Azure) supporting large-scale R&D and production systems. Delivered measurable impact through platform modernization and AI-driven automation, reducing build and environment setup time by up to 70% and manual workload by 30%, while fostering a people-first culture focused on ownership, discipline, and continuous improvement.

Professional Experience

Senior DevOps Manager | Amdocs | 2019–2025

Led strategic DevOps and Platform Engineering initiatives across multiple R&D groups, driving large-scale modernization, automation, and cloud transformation.

- Managed multiple DevOps and platform engineering teams (25+ engineers), including team leads and senior engineers.
- Recruited, mentored, and scaled leadership within the organization (DevOps managers and team leads).
- Owned end-to-end design and implementation of enterprise CI/CD and release platforms.
- Led multi-cloud platform deployment and automation across AWS, Azure, and OpenShift.
- Introduced AI-driven automation solutions, reducing manual operational workload by 30%+.
- Built AI-powered tools to improve engineering productivity and workflow efficiency across teams.

Co-Founder & Chief Technology Officer (Parallel Role) | Androme | 2018–2022

Led the technology vision and execution for a startup focused on machine learning–based mobile solutions, alongside a full-time leadership position at Amdocs.

- Co-founded Androme and defined the technology strategy, architecture, and product direction.
- Led end-to-end development and delivery of ML-based mobile solutions.
- Owned all technical aspects of the business, including architecture, execution planning, and budget management.
- Supported fundraising activities and investor discussions from a technical leadership perspective.

DevOps Manager | Amdocs | 2015–2019

Led DevOps delivery and operational excellence across multiple enterprise products and environments.

- Managed multiple DevOps teams responsible for operational development and platform stability.
- Owned end-to-end DevOps processes and activities for four major products.
- Led cross-organizational DevOps coordination, standardization and governance.
- Built automation validation framework, improving installation quality by 50–70%.

Technology Manager | Amdocs | 2013–2015

- Managed a team of 12 engineers and led automation initiatives to accelerate release cycles and improve delivery reliability.

System Integration Engineer/ Expert /Focus Master | Amdocs | 1998–2013

- Managed a team of 6 engineers building end-to-end integration and automation solutions.
- Designed and developed complex integration solutions improving installation efficiency and system quality.
- Supported enterprise code builds and environment setup.

Information & Communication Technology | IDF | 1995–1998

- Managed technical operations focused on system reliability and process efficiency in a military environment.

Technology Stack:

Cloud: AWS, Azure

Containers: Kubernetes, OpenShift, Docker

CI/CD: Jenkins, GitHub, ArgoCD, Nexus, Artifactory

IaC: Terraform, Ansible, Helm

Languages: Python, Java, Groovy, Bash

Databases: Oracle, PostgreSQL, Couchbase, Snowflake, Databricks

Tools: Jira, Confluence, GitHub Copilot, Cursor

OS: Linux, macOS, Windows

AI: GenAI, AI-driven Automation

Education: B.Sc. in Mathematics and Statistics, Bar-Ilan University

Languages: English – Fluent | Hebrew – Native | Russian – Native | Ukrainian – Native
